Edition #2 2023

What's new with

leviy
a zvoove company.

Dashboard

Close date and time of issues

The overview page of an issue now also shows the date and time it was closed.

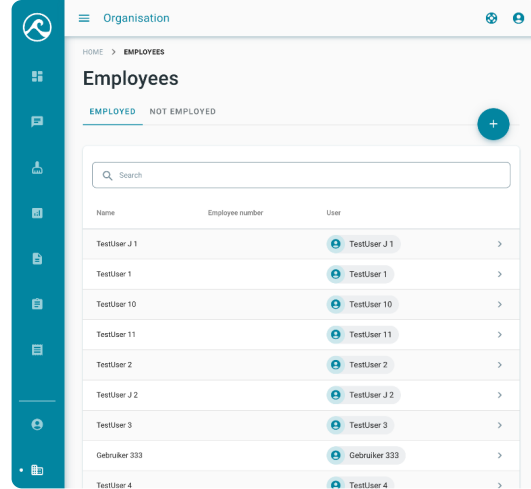

Read more

Employees in two tabs

In Organisation, employees are divided into two overviews, 'Employed' and 'Not employed'. This gives a better overview and makes management a lot easier!
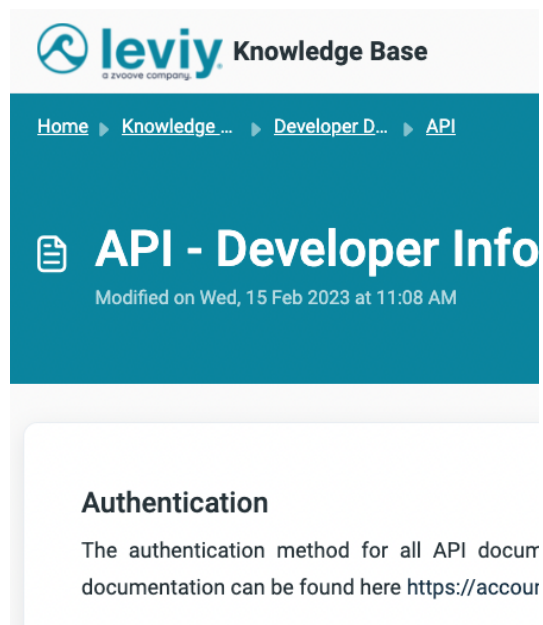

Read more

Cleaning Statuses API

We have launched a new API for changing cleaning statuses. This allows you to realise an integration with, for example, a reservation system, smart sensors or an EPD.

APA documentation

App

Improved overview per cleaner

When you group the units per assigned cleaner on the new units overview, you can now see an overview of cleaning statuses per employee at a glance. You might also notice that the readability is improved!
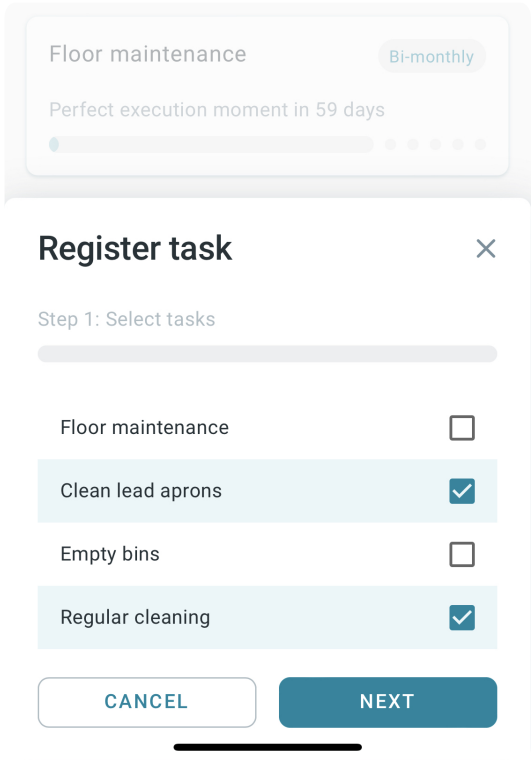

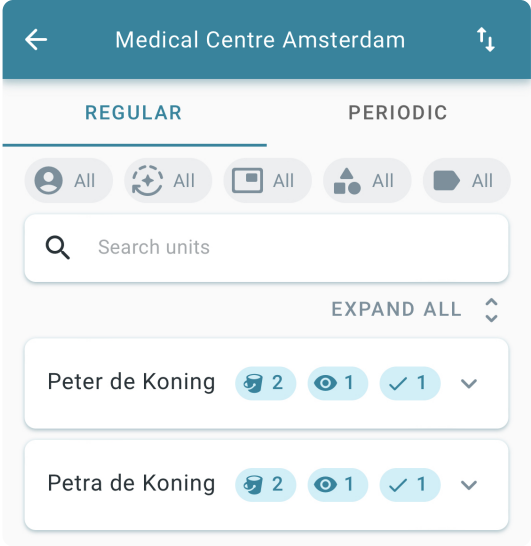

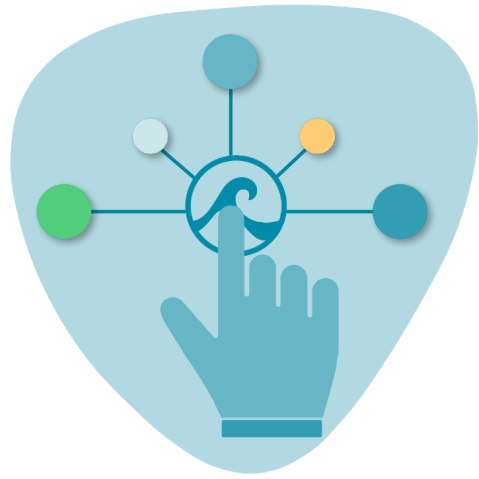

Read more

Easily register multiple tasks

The task registration pop-up has been redesigned and has an updated view which better supports working with multiple tasks, yes!

Read more

Smoother status change

Changing a cleaning status feels a lot smoother. Why? The changes are handled immediately without the need for synchronising.
