App

Simpler to-do list for cleaners

We've made it even easier for cleaners to know what needs to be done! With just one click from the Home screen, they can see all the rooms that need cleaning according to that day's work schedule. And when they've completed a task, they can immediately mark it as done for that specific room.

The overview remains perfect as **only the rooms with outstanding tasks are displayed**. As a follow-up to this, we are working on the option to be able to register what could not be performed. More about this soon!

Work, break and travel time registration

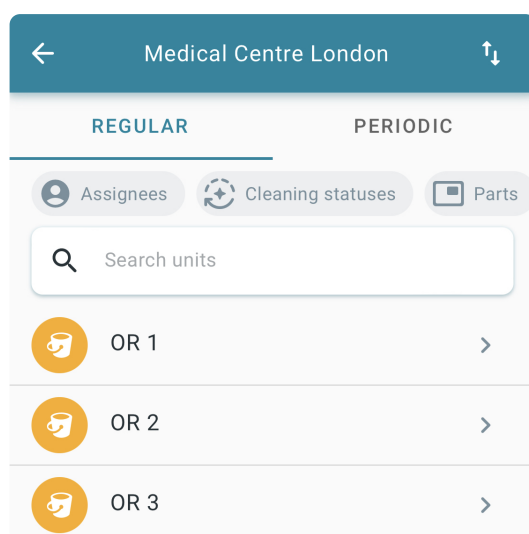

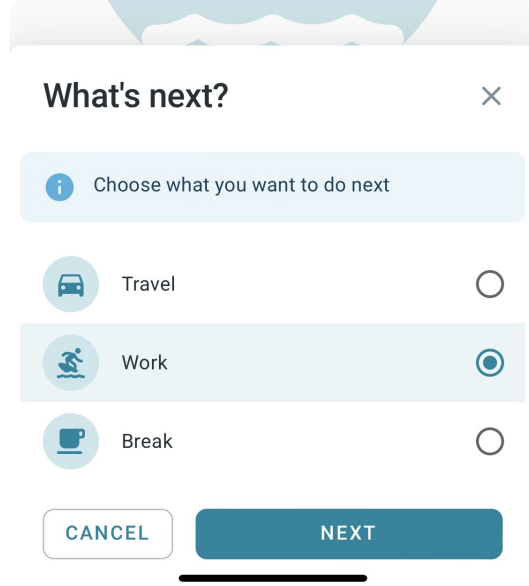

Experience the revolution in time registration! From now on, not only can you **track your work and break times** from the object overview, but you can also effortlessly **register your travel time** and **adjust your registered times**. And that's not all - you can now start recording directly from the Home screen!

Don't miss out on these groundbreaking new features and be one of the first to try them out by signing up for our exclusive test team!

Smarter `Assigned to me` filter

The new units screen is now filtered by default to show units assigned to the logged-in user. When not working with unit assignments, this filter had to be turned off every time. That's why the 'Assigned to me' filter is now only enabled by default for objects that have unit assignments. Additionally, the name of the logged-in user is always displayed at the top of the list of assigned persons, making it easy to select.

Easily reset filters

Save valuable time with our new feature that allows you to reset all chosen filters with just one click. No need to waste time deselecting each filter individually if there are no results. Experience ultimate usability and convenience now!
