

In the coming months, we will be working towards **more frequent releases of our platform**. This is driven by the desire from our customers to **quickly deliver** new features to end users.

Do you have any feedback or requests? [Let us know here](#) and we might translate your feedback into a great improvement!

let us know!

DKS

In the dashboard, you can schedule a 'DKS without definition'. This occurs in organizations that have set up multiple DKS definitions containing different types of spaces. For example, a 'DKS - Schools' where the space type includes classrooms, or a 'DKS - Healthcare' where the space type includes patient rooms. The selection screen for the inspector to choose the correct DKS definition has been **simplified** and now has the **appropriate look & feel**. One less hurdle to get started with the app! 🚀

RQMS

When registering an error, in addition to the photo, the error can now also be **explained** with a **textual comment**. This comment will naturally be included in the PDF report as well.

CHECKLISTS

Select DKS

Example DKS!

Custom Dks Definition

R&C Dks Definition

Another Dks Definition

The title on the PDF report was sometimes shortened because it didn't fit. We made some changes to the logic and font size, so now the title can almost always be displayed.

Some customers found that they occasionally forget to sign the checklists. To **prevent** this, we added a **warning** before submitting them.

WORK SCHEDULE

Documenting the reason for 'not performing' tasks

Does the client have questions about why the cleaning was not performed? **In the cleaning module, under *insights*, you can immediately see the reason why a cleaner couldn't carry out the task.** The name of the cleaner is easy to find, so you know who worked on what
