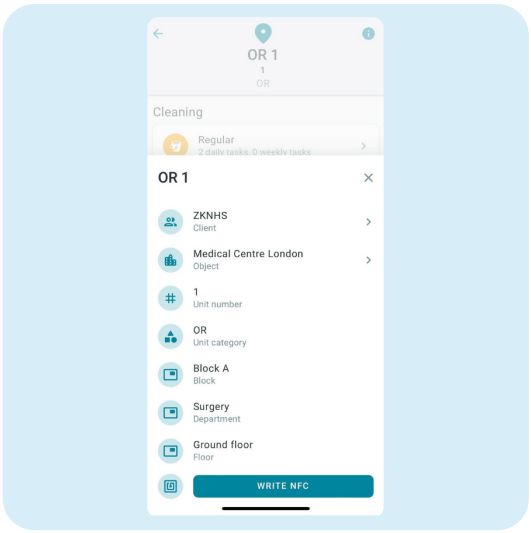
Edition #2 2024

What's new with leviy

a zvoove company.



Cleaning

New unit overview

To emphasise open tasks, issues and audits the unit overview has undergone a metamorphosis.

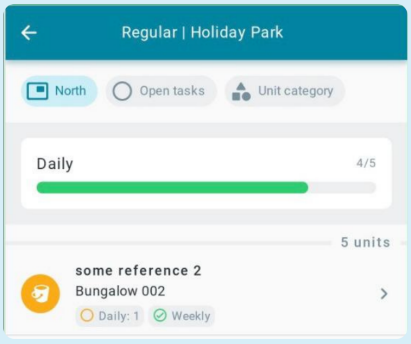
Cleaning

Colour cleaning status

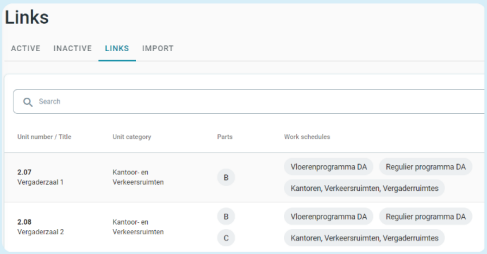
The display of the cleaning status and the associated information has also been revamped. This way you can instantly see if there is something that needs to be done by the colour of the status.



Cleaning

Progress indicator

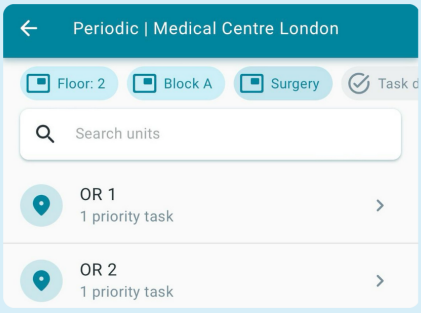
At the top of the bar, you can see how many units there are in total, and how many of them have completed their daily tasks. This way you can see your to-do list getting shorter!



Cleaning

Linked work schedule

From an overview of all units of an object, it is possible to see which work schedule the units are linked to. Soon it will also be possible to link the work schedule directly from this overview.



Cleaning

Parts filter

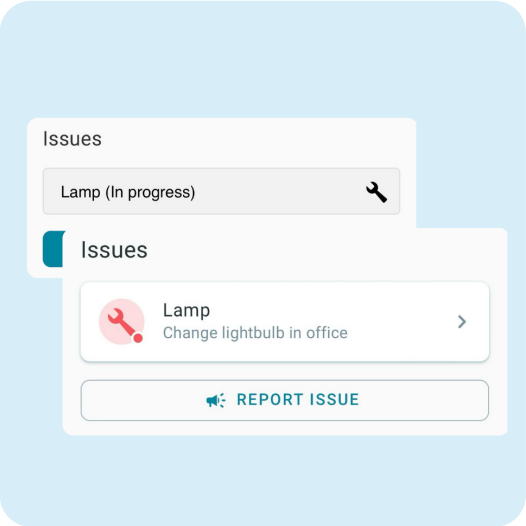
The Parts filter had already been adjusted for regular cleaning. Instead of clicking on the 'Parts' filter, you select the layout, for example 'Floors' or 'Departments'. Now, the same modification has been made for **periodic tasks** and in the **unit screen**.

General

SSO - single sign-on

When logging into Leviy, it is possible to log in with an external account, SSO - single sign-on. This means you can use an existing

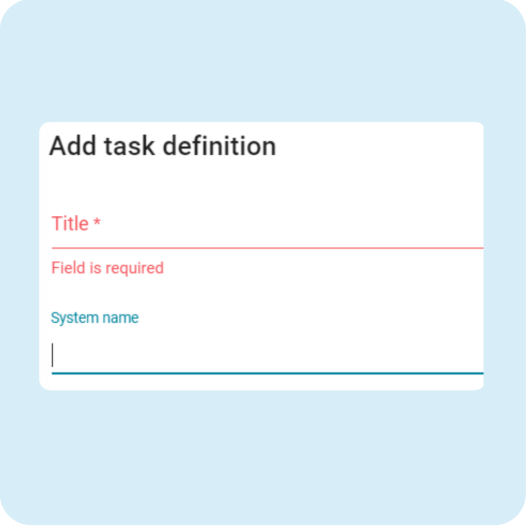
account and password, which results in having fewer different login information, making it easy!



Issues

Description issues

From now on the description of the issue will be shown. The status will now also be shown in colour.



Task definition

System name optional

Entering a system name when configuring a task definition has been made optional.
