a zvoove company

Work schedule

Rocket mode

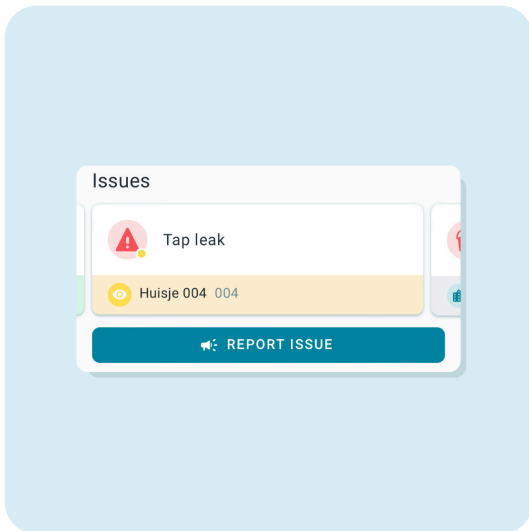

From now on, you can register the daily tasks of multiple units at once. To do this, click on the cleaning status of the units for which you want to register the tasks. You can select up to 7 units at the same time. That's convenient!

Work schedule

Recurring daily tasks

Some units need to be cleaned multiple times a day. To indicate which of these units have had tasks registered, we display an indicator with the time. This way, it is immediately clear that you have completed the task.

Issues

Display issues

On the client, object, and unit screens, you can swipe through these issues! This ensures that the issues take up less space on the screen, making it easier for you to access other actions.

Extra

On the client and object screens, you can see the cleaning status of each unit per issue. Additionally, the "report issue" button has turned blue for quick recognition.

See you next release!
