a zvoove company

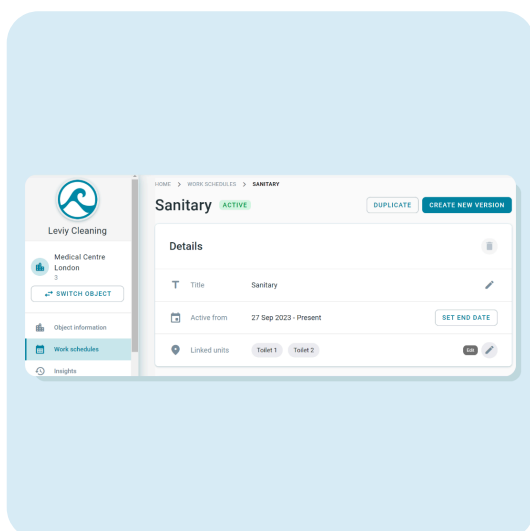

Cleaning

Linked work schedules

In the overview of linked work schedules, you can now find information like unit numbers. It is also possible to search for a work schedule.

[Read more in our release notes](#)

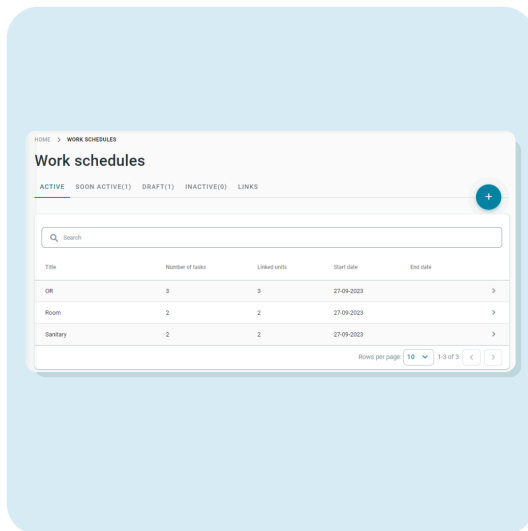

Cleaning

Edit work schedule

From now on it is possible to edit the linked units to a work schedule. In addition to being able to change the title of a work schedule, units can also be added and removed.

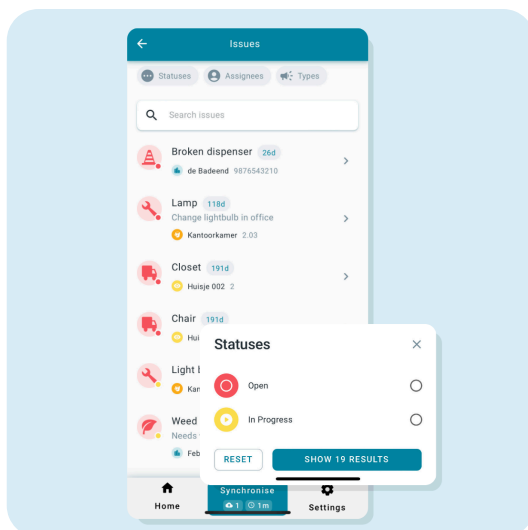

Note: Changes to the work schedules take effect immediately. Do you want to apply changes that will become effective in the future? Then we advise you to create a new work schedule.

Cleaning

(In)active work schedules

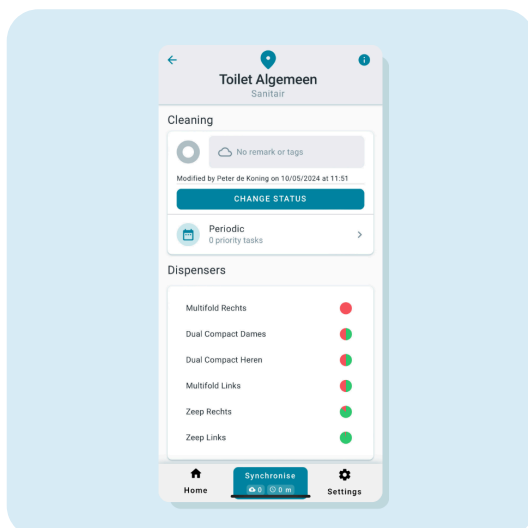

An additional tab *Soon Active* has been added to display work schedules with start dates in the future. Inactive work schedules are no longer visible on the Links page and the edit Linked units page.

Issues

Display issues

The display of Issues in the App has been completely refreshed. Additionally, filters have been added, such as status or issue type. This allows you to have the issues that are relevant to you readily available.

Dispensers

SmartConnect

In partnership with MTS Euro Product, we are developing an innovative solution to monitor the status of dispensers for consumable products such as toilet paper, paper towels, and soap. Thanks to sensors installed in the dispensers, you can easily check their fill levels via the App.

See you next release!
