Cleaning

Progress bar

The progress bar at the top only indicates the number of units that have today's scheduled tasks. This way, the progress is displayed more accurately.

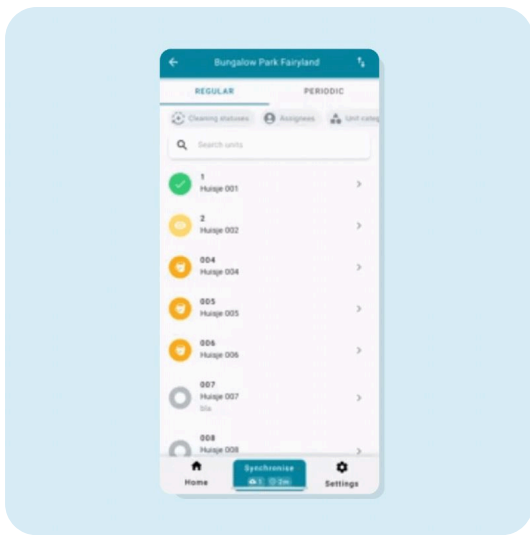

[Read more in our release notes](#)

Cleaning

Indicator per unit

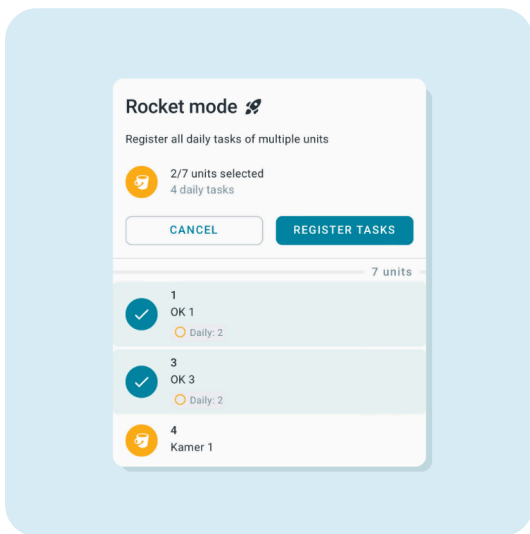

The icon with the green checkmark indicates whether the daily or weekly tasks have been completed. No icon will be displayed when there are no daily or weekly tasks. This makes it clear which scheduled tasks are listed.

Cleaning

Screen position

After performing an action on the unit screen, you return to the same position in the unit list as before clicking on the unit. This way, you don't have to scroll through the entire list each time, which is convenient!

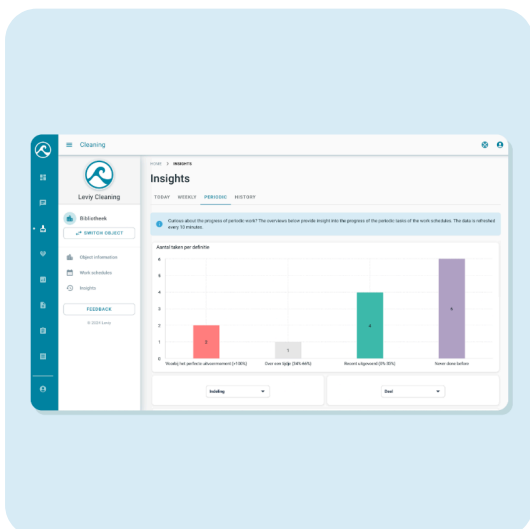

Cleaning

Rocket mode

When Rocket mode is active, you can now click on the entire row to select a unit, making it much easier.

Automatic task cancellation

Open weekly tasks that have not been completed after one or two weeks, and open tasks from a work program that are no longer linked to the respective unit, will now be automatically cancelled. These tasks are no longer applicable and therefore do not need to be completed.

Insights

Periodic work

From now on, there's an insight page for periodic tasks. This provides insight into the progress of the periodic tasks defined in the work schedules.

Screen alignment

The alignment of the elements on the screen will henceforth remain consistent, even when longer texts are displayed.

See you next release!
